## **To Whom It May Concern**

It is my great pleasure and honor for me to write about Mr. Rajat Aditya Raj as he is aspiring for MS in Computer Science to your esteemed University. I know Rajat Aditya Raj since 2010. He was my student while I was faculty member of Department of Computer Science at Neotia Institute of Technology, Management and Science (NITMAS). I have taught him Data Structure and Algorithm, Computer Networks and Distributed Operating System. He has completed his B.Tech program in Computer Science and Engineering in 2014.

I am immensely impressed by his hard work, sincerity and passion to learn beyond the text. He would always ask the most thought provoking questions and be inquisitive trying to delve deeper into the more difficult and complicated topics, which his peers would steer away from being satisfied with the knowledge required within the syllabus. I was not surprised when this attitude of his paid high dividends for him when his final year project of a mobile application of a College Networking System written in C# asp.net windows form using the visual studio environment exceeded my expectation in terms of its design and simplicity of the code yet achieving high end features such as its interactive console for viewing and updating events, setting up triggers for automatic notification between the teachers, parents and students, etc. His team's presentation of the project had everyone thoroughly impressed in the audience during the college's annual technical fest of Sankalp.

Rajat is a well-rounded and confident person with a very friendly and cheerful personality and used to play basketball for the college team. He has strong interpersonal and communication skills and I am confident he will do extremely well in a cross-cultural setting. I would rate him among top 5 percentile of students I have had the pleasure to teach. His commitment and dedication enabled him to get a highly desirable job with Wipro, the very first company to visit the college for campus placements.

I concur with his decision to pursue higher studies as I am confident that his thirst for knowledge and determination to excel will guide him to success in the graduate program. From our recent conversations, it is clear he has gained a wealth of knowledge and business expertise in the fields of VMware Virtualization, Networking and Cloud technologies in the course of his professional career and I feel that the time is right for him to go for higher studies to further unlock his potential and use his creativity to reach great heights in the fields and research he wishes to pursue.

I wish Rajat Aditya Raj all the success in life.

Thanks and regards,

Dr. Arijit Ghosal,  
Associate Professor,  
Department of Information Technology,  
St. Thomas' College of Engineering & Technology  
Kolkata – 700 023, West Bengal, India
